

# Ultrasonic SCBA Cleaning System

**Specially Designed to Clean Your SCBA Masks Better**

Our systems and solutions are easy-to-use, environmentally friendly, and cost efficient. Fire departments and industrial safety facilities throughout the country depend on us to get their equipment flawlessly clean without damaging the integrity of the apparatus. Major mask manufacturers recognize Ultrasonic Cleaning technology as an accepted SCBA cleaning method. Ultrasonic Cleaning offers the most thorough cleaning and disinfecting process with minimal disassembly; it reaches both interior and exterior surface areas, where most manual cleaning processes will miss. Ultrasonic Cleaning gives you the best overall cleaning at an affordable price.

Easy-to-operate

**Note:** number of masks cleaned at one time will vary depending on mask size

**All Systems Include: Ultrasonic Cleaning Unit, SCBA Rack and Cleaning Solution**

## Multi-Pak™ and Technical Rescue Cart

The MULTI-PAK™ series of small bottle air carts has been designed with the user in mind. Choose from any basic designs to fit the simplest or most complex job application. All of the small MULTI-PAK™ carts feature fold-down handles, recessed control panels, rounded cart corners, quick-release hose racks, and many other features. For complex air distribution applications, choose the Technical Rescue Cart which has been designed to provide air for all the various respirators and unique rescue tools used by Technical Rescue Teams. Stainless steel cart and color designated control panel allow one side of panel for respirator breathing air and one side for any tool requirements. Either cylinder air or mobile truck air can operate this cart.
