

Foam Proportioning Systems and CAFS

Fast Foam 50 or 250

- APPLICATIONS**
- ▶ Mini pumper – 50, 250
 - ▶ Pumper tanker – 250
 - ▶ Pumper – 250
 - ▶ Wildland – 50, 250

- STANDARD EQUIPMENT**
- ▶ Stainless steel check valve
 - ▶ Venturi
 - ▶ Panel mounted controller
 - ▶ Installation kit

Fast Foam 250

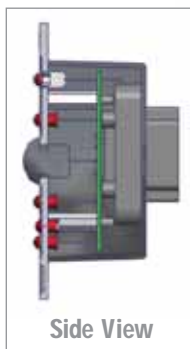

Fast Foam 50

Features: The Fast Foam systems offers a reliable, accurate, compact foam proportioning system at an economical price. The systems are optional and for use on single and dual line systems.

| Model | Performance | Dimensions | Weight | Price |
|---------------|---|-------------------|-----------------|------------------|
| Fast Foam 50 | Up to 50 gpm @ 1% at pressures up to 175 psi | 19" Lx10" Wx14" H | 64 lbs. (29 kg) | Call for Pricing |
| Fast Foam 250 | Up to 250 gpm @ 1% at pressures up to 250 psi | 21" Lx10" Wx12" H | 75 lbs. (34 kg) | 877-634-6223 |

Odin AutoValve

The AutoValve will change CAFS operations. Anyone can operate this valve, and get CAF the first time, every time. The AutoValve is actually two programmable electric ball valves: one water, one air, which respond to commands from a remote placard. Depress the button which has the flow type desired, and the valves move to pre-programmed flow rates. Easy! If you forget to turn on your chemical solution system or run dry of chemical during operations, the AutoValve will flash a warning light, turn off the air and move the water valve to a fully open position. Safety! Front bumper monitors require variable flow rates that currently are very hard to attain with normal electric valves, especially while driving. This valve will deliver CAF and full flows with the ease of one button! Versatile! This is of real value to firefighters and to OEM's with crowded building requirements. The AutoValve kit also adapts as a retro fit on Akron and Elkhart ball valves.

PTO Driven Compressor Kit

- APPLICATIONS**
- ▶ Mini pumper
 - ▶ Rescue pumper
 - ▶ Tactical tender
 - ▶ Wildland/Interface

- STANDARD EQUIPMENT**
- ▶ Custom control panel with full instrumentation
 - ▶ Rotary screw compressor
 - ▶ AutoOdin balance valve system
 - ▶ Factory assisted installation
 - ▶ Available in 150 and 200 cfm

Features: The PTO kit can be utilized for new or existing applications. The compressor receives its power from the apparatus transmission PTO. Please consult Odin for the correct engineering application. Pump is supplied by customer.

| Model | Performance (Air) | Dimensions | Ship. Wt. | Price |
|---------------------------|--|--|---------------------------------------|----------------------------------|
| PTO Driven Compressor Kit | 200 cfm @ 125 psi 150 cfm @ 125 psi | Contact Odin Foam for Schematic and CAD Drawings of Components | 600 lbs. (272 kg) 550 lbs (249 kg) | Call for Pricing 877-634-6223 |
