

Sliding Pole Landing Mat

No fire station equipped with a sliding pole should be without a landing mat. It's 2" thick foam pad with unicell construction which helps cushion landings. Measures approximately 32" in diameter with a 3 1/2" center hole. The materials are similar to those used in marine applications and as such are impervious to oils and will resist dry rot. Installs by sliding over top of station pole. Also available for larger or smaller diameter poles. *Ship. wt. 10 lbs.*

Nylon Flags

Offers the combination of beauty and long-life for every purpose. The 100% nylon material provides a rich, lustrous appearance. Because of the superior strength-to-weight ratio, Dura-Lite flags have superb wearing strength, yet are so light, they fly in even the slightest breeze. These quality flags have individually embroidered or sewed stars. Stripes are carefully sewn together with a special thread, using a lock stitch for long life. All flags are finished with a strong, polyester canvas heading and spur-type brass grommets. Larger sizes have roped headings with galvanized metal thimbles.

L897	3'x5' Nylon U.S. Flag	\$22.95
L898	4'x6' Nylon U.S. Flag	\$29.95
L899	5'x8' Nylon U.S. Flag	\$44.95
L899A	6'x10' Nylon U.S. Flag	\$64.95
L900	8'x12' Nylon U.S. Flag	\$127.95
L901	10'x15' Nylon U.S. Flag	\$200.95
L901A	12'x18' Nylon U.S. Flag	\$295.95

How to Choose the Right Flag Size

To determine the most effective size flag for your flagpole: the length of the flag should be approximately equal to one-fourth of the height of the pole above the ground. For example, the recommended size flag for a 40' pole is a 6'x10' flag.
