

HeartStart OnSite Defibrillator

The First Defibrillator Available Without a Prescription to Commercial Users

NEW

Philips, the leader in portable defibrillation innovation, designed the HeartStart OnSite Defibrillator for the ordinary person in the extraordinary moment. The first commercial defibrillator without a prescription, the OnSite is designed to be the easiest to use and most reliable defibrillator available. The innovative technology, based on extensive research and user feedback, has produced a defibrillator so easy-to-use that you can potentially save the life of a coworker, friend, or anyone else stricken with sudden cardiac arrest. Weighing just 3.3 pounds, this small and lightweight defibrillator can be easily carried to the victim's side. Using clear, calm voice instructions, the OnSite Defibrillator guides you through each step of defibrillation, including CPR coaching. Integrated SMART pads placed on the victim's bare skin transmit information to the defibrillator, which senses and adapts to your actions every step of the way. HeartStart OnSite includes proven Philips technologies for heart rhythm assessment (SMART Analysis) and defibrillation energy delivery (SMART Biphasic). And like all HeartStart defibrillators, it can be used to treat infants and children as well as adults.

Ready When Needed

The OnSite has a long-life battery:

- ▶ 5-year shelf life plus 4-year installed life
- ▶ Same battery technology used with confidence in millions of cameras

Automatic self-test helps ensure continued readiness:

- ▶ Daily self-tests check electrical components, subsystems and battery
- ▶ Self-test also verifies that the pads cartridge is installed and in working order
- ▶ Blinking green "Ready" light means the OnSite has passed its last self-test, so you can be confident the defibrillator is ready for use

Easy-to-Use:

- ▶ Using the HeartStart Defibrillator is simple. Pulling the green handle activates the defibrillator and voice instructions. These instructions are paced to your actions, to help guide you through the entire process from placing each pad on the patient to delivering a defibrillation shock.

HeartStart FR2+ Defibrillator

The FR2+ has come to be a trusted tool of professional responders and designated response teams in the work place and public settings. Its clean, uncluttered design is optimized for fast, efficient operation and rapid delivery of defibrillation therapy. Commands are clear, streamlined, confident, and concise: ideal for responders who are trained, drilled and ready to save a life. The HeartStart FR2+ offers features that make hand-off to ALS professionals seamless for maximum continuity of care for the patient. A display of the ECG is available. The FR2+ can be configured to allow ALS responders to switch to a manual mode, giving them more decision-making control. And defibrillator pad adapters enable the pads to remain on the patient when transferring to many popular ALS manual defibrillators. But don't be misled by its advanced capabilities. The HeartStart FR2+ is extremely easy-to-use. Its design is based on years of research, refinement by Philips human factors experts and user testing with the full range of responders from healthcare professionals to lay people. In fact, hundreds of thousands of citizens are already trained and ready to save a life with the FR2+.

NEW

Features:

- ▶ Lightweight: Fully equipped at just under 5 lbs.
- ▶ Rugged: Designed for use in extreme environments and conditions
- ▶ Intuitive: 1-2-3 operation, with text and voice prompts
- ▶ Capable: Available for use on anyone of any age, including children
- ▶ Ever-ready: Powered by either a long-life disposable or a rechargeable battery
- ▶ Effective: Clinically proven low-energy waveform
- ▶ 5-year warranty
