## Medium Duty Cantilever Racking

Medium-Duty Cantilever Racks are ideal for manual loading; open design allows easy forklift accessibility. Store bar stock, pipe, tubing, lumber, and other light hard-to-stock items that must be kept off the floor. Arms are adjustable up and down the full length of the upright. To adjust, align arms with pre-drilled holes and secure with key lock. All arms feature lips to prevent product from falling off. Uprights are sold separately, not in pairs. Custom rack systems can be designed for your special application.
