

Mobile Tilting Work Tables

Designed to bring work to an ergonomically correct position, helping to foster a more comfortable and productive work environment. Working in a comfortable position also reduces fatigue and risk of injuries. Platform height and tilt angle are manually adjustable, with the exception of model WT-2424-LA, which uses an electric linear actuator with a hand control and 115V AC motor. Four 3½" x 1¼" polyurethane swivel casters (two double locking) allow unit to be transported from one work area to another while loaded. All steel construction.

Transportable Stacker

This stacker will allow you to lift and move boxes and containers with ease. The unique design will also allow you to load it into the back of your truck or van without the need for heavy lifting or an overhead crane. To load into your truck, raise forks above truck bed and push the unit forward completely over truck bed. Push the lower button and hydraulic system will lower forks to truck bed and then begin to raise the rest of the stacker automatically! Features 12V DC battery power with push-button operation. Includes two rigid and two swivel casters. Steel construction.
