## Steel Railroad Dockboards

Model Number Format:

RS - **CAPACITY** - **WIDTH** - **"A" DIMENSION** - **"B" DIMENSION**

NOTE: DIMENSIONS ARE IN INCHES

### STANDARD FEATURES

- Auto Drop Locks (add 13" to overall width)\*\*
- Pop-up Fork Lift Loops
- Steel Rectangular Board
- Overlap Style Plate (both ends)
- Safety Curbs are 4" High
- High Strength Cross Traffic
- Treadplate for Better Traction
- Structural Steel Support Beams

**DROP LOCKS** are designed to automatically keep the railboard tight against the car, accommodating for various railcar widths. These cast bars measure 1" thick. (standard)

**POP-UP-LOOPS** automatically pop up and stay when rail dockboard is sitting on dock. Operator pulls loop up and locks to take out of car. Loops measure 24" on center. (standard)

### ALTERNATIVE DESIGN OPTIONS

- Replace pick-up loops with chains
- Replace automatic-drop locks with pin locks
- Flush Style Plate, replaces overlap style and minimizes board overlap into car
- Flared Board offers greater flexibility for tight turning radius applications. Contact factory for pricing.
- Specials: Different widths and configurations are available, contact factory for pricing.

**PIN LOCKS** provide an economical alternative to the drop locks. (alternative design)

**PICK UP CHAINS** provide an economical alternative to pick up loops. (alternative)

**FLUSH STYLE** is used when user doesn't want lip overlapping into cargo area.

**HIGH CUBE DESIGN** are custom built for the 86 foot car for automotive applications.
