

# Utility Channel Ceiling System

The utility channel ceiling system aligns services (lighting, sprinklers, speakers, etc.) along narrow bands running the length or width of a ceiling. Fitted with sleek 6" fiberglass lay-in panels or PANZ™ metal panels, the system concentrates mechanical systems, maximizing high-NRC areas and bringing greater order to the ceiling design. System components and options include:

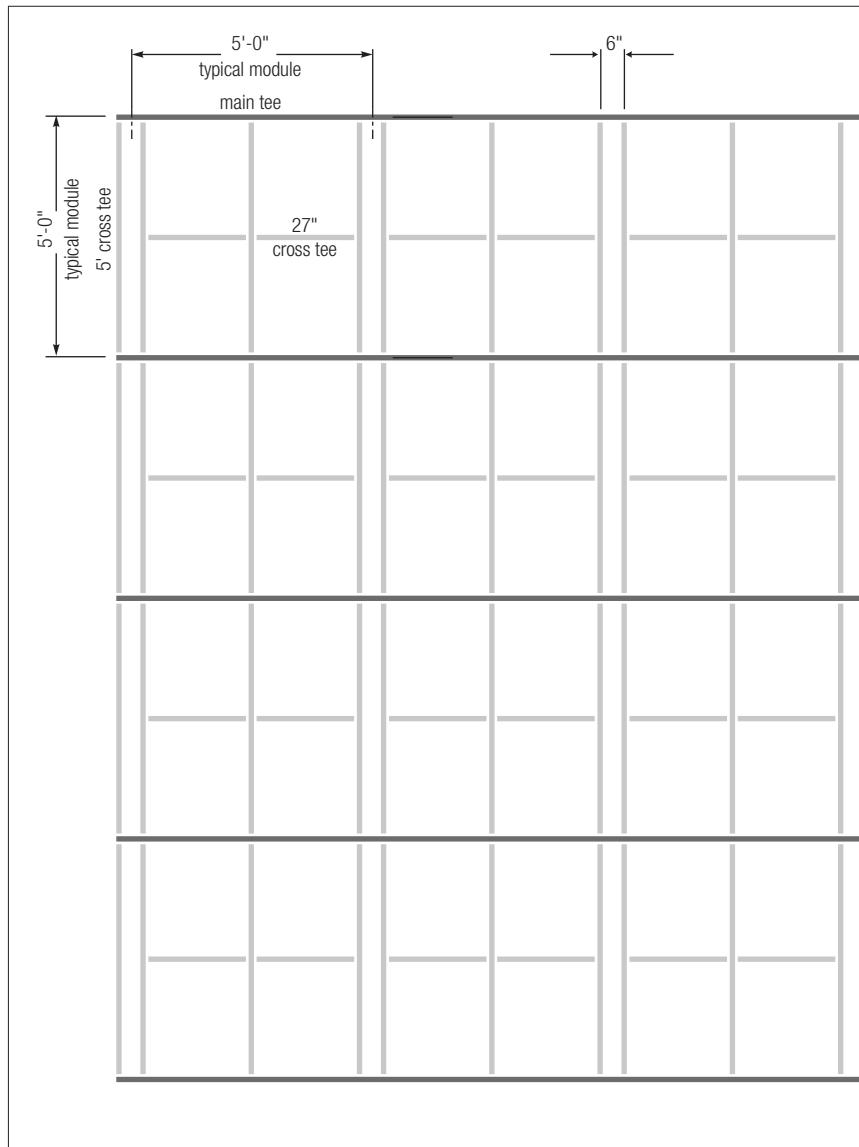

<b>Ceiling Panels</b>	<b>Field Panels</b>	HALCYON™ CLIMAPLUS™ fiberglass panels in a wide range of standard and large-module sizes. These high-performance panels feature high light reflectance and excellent sound control for open-plan areas (.90 – .95 NRC, 20 CAC).
<b>Utility Panels</b>		6" fiberglass HALCYON™ panels and 6" flat-white metal PANZ™ lay-in panels. PANZ utility panels are available solid or perforated. Two perforation patterns are offered, with black ACUSTIBOND® backer standard; this backer may be declined when ordering. See page 3 for details.
<b>Edge Details</b>		HALCYON field panels and utility panels: Fineline (FL), Shadowline (SL), and Square Edge (SQ). PANZ utility panels: Fineline (UFL), Shadowline (USL), and Square Edge (USQ)
<b>Suspension System</b>		15/16"-face DONN® DX®/DXL™ and 9/16"-face DONN® CENTRICITE™ DXT.

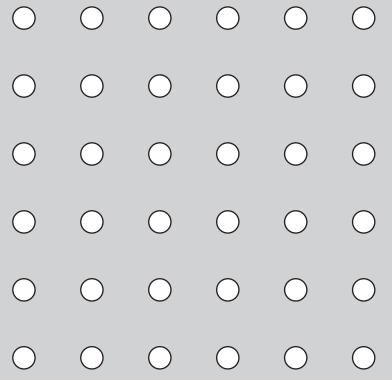

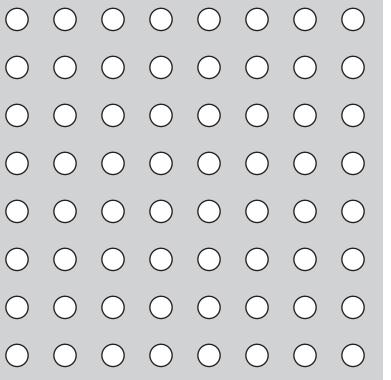

# Overview

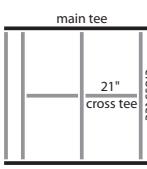

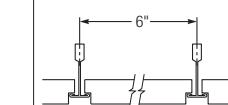

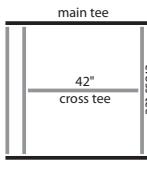

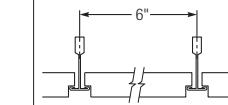

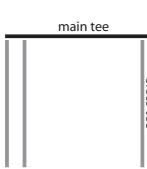

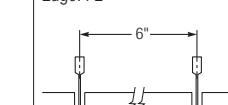

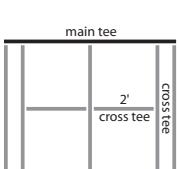

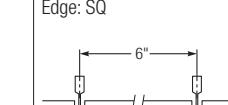

## Assembly

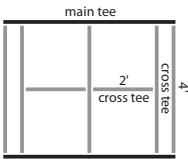

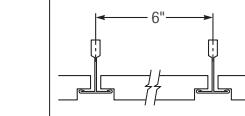

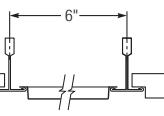

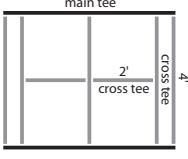

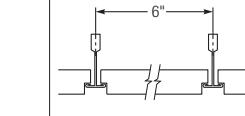

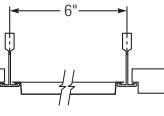

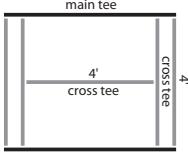

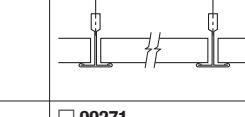

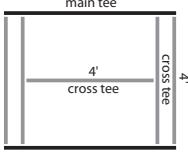

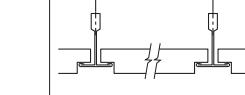

All assemblies feature 6" utility channels, which border each module on two sides. Available module sizes range from 4' o.c. to 10' 6" o.c., with a broad offering of field-panel sizes. The module size shown here is 5' o.c., with 27" x 30" field panels.

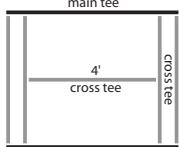

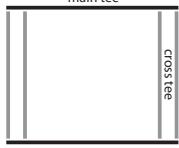

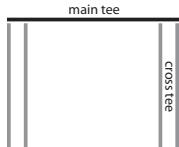

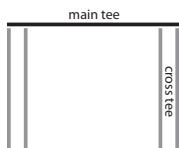

<b>Calculate Material Usage</b>	On the following pages a usage multiplier is provided for each panel and suspension tee to calculate the materials needed for your project.
<b>Field Panels</b>	Multiply the square footage of the space by the panel usage multiplier specified in the selected design to determine the square footage of field panels required.
<b>Utility Panels</b>	Multiply the square footage of the space by (1.00 minus the panel usage multiplier specified in the design selected), and deduct for light fixtures and air diffusers, to determine the square footage of utility panels required.
<b>Main Tees</b>	Multiply the square footage of the space by the main-tee usage multiplier specified in the selected design to determine the lineal footage of main tees required.
<b>Cross Tees</b>	Multiply the square footage of the space by the usage multiplier for each cross tee specified in the selected design to determine the lineal footage of cross tees required.
<b>Perforation Patterns</b>	RANZ metal utility panels are available in Flat White, solid or perforated. Two perforation patterns are offered, with black Acoustibond® backer standard; this backer may be declined when ordering.
<b>Pattern No. C116</b>  Round – 15/128" perforations .344" o.c., 8% open area	<b>Pattern No. C116D</b>  Round – 15/128" perforations .250" o.c., 17% open area
