

SHEETROCK™ Brand Flexible Metal Tape-On Corners

Straight, strong corners at any angle

- Fast, easy installation reduces labor costs
- Resists edge cracking and chipping to eliminate costly job callbacks and ensure customer satisfaction
- Unique, patented nose coating minimizes scuffing and fuzzing when finishing and sanding
- Strong paper tape covering provides excellent adhesion of joint compounds, textures and paints
- Applied with joint compound—eliminates nail popping when wood framing shrinks

SHEETROCK Brand B2 Flex Metal Tape

SHEETROCK Brand B1 Beaded Flex Metal Corner

Description

United States Gypsum Company offers the widest selection of flexible metal corner tape products in the industry. Specifically designed to provide straight, strong corners on any inside or outside angle, the SHEETROCK™ Brand Flexible Metal Tape-On Corner products are ideal for use in a variety of drywall applications including vaulted ceilings, coffered ceilings and bay windows. Manufactured with two steel strips attached to a strong paper tape covering, SHEETROCK Brand Flexible Metal Tape-On Corners provide superior product performance.

Three styles are available to meet a variety of needs:

SHEETROCK Brand Flex Metal Tape—Tape-On Flexible Corner The original flex metal tape designed for all-purpose use on any inside or outside angle. Available in a 2-1/16" width that has two 7/16" wide galvanized, rust-resistant steel strips with a 1/16" gap between the strips. For maximum strength and coverage, the tape is also available in a 4" width that has two 7/8" wide galvanized steel strips with a 1/16" gap between the strips.

SHEETROCK Brand B1 Beaded Flex Metal Corner—Tape-On Outside Flexible Corner New, patented style designed specifically to make strong, straight outside corners. B1 Beaded Flex is available in 3" width and manufactured with two 3/4" wide galvanized steel strips laminated to paper tape with a flexible gap between the strips. It has a unique raised bead (nose) in the flexible gap to provide faster, easier finishing with joint compound.

SHEETROCK Brand B2 Flex Metal Tape—Tape-On Inside Flexible Corner Designed specifically to make straight, strong inside corners of any angle. Ideal for vaulted ceiling angles and vertical inside angles. Available in a 4" width that has two 7/8" galvanized steel strips with no gap between the strips. Placing the steel strips together, along with the extra wide paper width, results in extra strength and rigidity for straighter and truer finished inside angles.

SHEETROCK Brand Flexible Metal Tape-On Corners achieve the most cost-effective, problem-free, beautiful corners of any angle.

Warranty

SHEETROCK Brand Paper Faced Metal Drywall Tape-On Bead and Trim is backed by a lifetime warranty. When applied to a sound structure, built on a permanent foundation using recommended application techniques, we warrant that this product will not edge crack for the lifetime of the structure. Inside offset corners applied horizontally cannot be guaranteed against cracking. This warranty does not cover SHEETROCK Brand Paper Faced Metal Nail-On Bead and Trim. Contact United States Gypsum Company for complete details.

Directions

SHEETROCK Brand Flexible Metal Tape-On Corners are applied with standard joint compound for ease of installation—no special products are required. Using a 6" drywall knife, apply joint compound to drywall, forming inside or outside corner. Cut the flexible metal corner to desired length, fold down center and press into bed of joint compound with metal side against walls. Remove extra compound with taping knife. Allow to dry. Apply a fill coat of compound over the flexible metal corner. Feather coat slightly beyond taping coat; let dry and smooth with wet sponge if necessary. For inside corners, apply compound to one side and let dry, then cover other side. Apply another coat of compound feathering slightly beyond the prior coat; let dry and smooth with wet sponge if necessary.

Storage Store in dry place protected from moisture. Avoid bending or other damage.
