

## ARDEX CP Concrete Patch

ARDEX CP is a trowel-grade cementitious topping for filling and repairing areas of outdoor and indoor concrete above, on or below grade.

### Product Description

Ideal for filling or re-sloping existing concrete, ARDEX CP can be used to fill surface defects such as spalls, gouges and dormant cracks, to re-form concrete steps and curbs, and to resurface vertical concrete.

Recommended for residential and commercial use only, ARDEX CP can be used for a wide variety of applications, including sidewalks, patios, walkways, driveways, garage floors, pool decks – anywhere old concrete needs a new surface.

ARDEX CP is engineered with Portland cement and select high-performance polymers to readily bond to concrete surfaces, and it can be applied by trowel or screed. Once applied and allowed to properly dry, ARDEX CP can be sealed with ARDEX CG™ Concrete Guard™ and used as a wear surface, or dressed with ARDEX CD™ or ARDEX CD FINE™ Concrete Dressing. These finishes can also be installed over both the patched area and the adjacent concrete to create a uniform appearance.

### Benefits:

- Easy to apply by trowel or screed
- Hardens quickly
- Freeze-thaw resistant
- Produces a surface finish suitable for foot and rubber tire traffic
