ARDEX Exterior Concrete Repair & Restoration System™

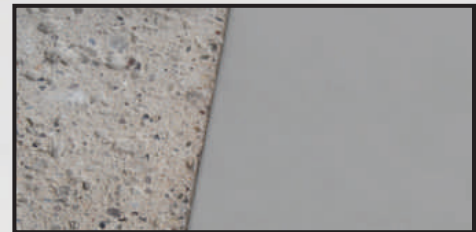

When driveways, sidewalks, loading docks, curbs, plazas, pool decks or any exterior concrete surface is in need of repair, ARDEX provides a comprehensive system of technologically advanced products to make damaged or spalled concrete look like new.

ARDEX fast-track, high-performance exterior products save significant time and cost in the restoration and repair of concrete surfaces. Whether it's a finished concrete look or a customized surface design using color or stencils, ARDEX has the right product for the job!

ARDEX K 301™ Exterior Self-Leveling Concrete Topping

The only high-performance exterior self-leveling product on the market that provides a fast-track new finish for damaged concrete surfaces. Can also be used as an indoor underlayment or topping for new building construction or existing building renovations that are not yet closed-in and will be exposed to weather and other external elements.

- Walk on 2 to 3 hours
- Apply sealer in as little as 24 hours
- Freeze-thaw resistant
- Wear surface or underlayment
- Makes badly spalled concrete look like new!

BEFORE

AFTER

ARDEX CD™

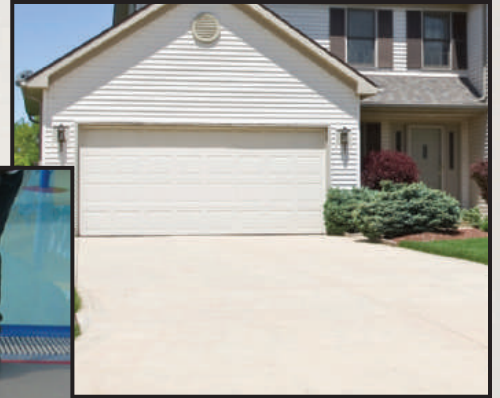

Concrete Dressing

03 01 00/ARD

BuyLine 8938

Resurfaces concrete to a “new-finish”. ARDEX CD creates a new wear surface that can be broom finished for a slip resistant texture. It can also be stenciled or colored for unlimited custom design options.

- Easy to apply & hardens fast
- Freeze-thaw resistant
- Walk on in 2 to 3 hours
- Drive on in 8 hours
- Available in regular and fine formulas

ARDEX CP™

Concrete Patch

Repair, re-slope or reform any concrete surface with this fast-track Portland cement-based patch. Use ARDEX CP to fill spalls, gouges, dormant cracks, “birdbaths” and other low areas in concrete surfaces.

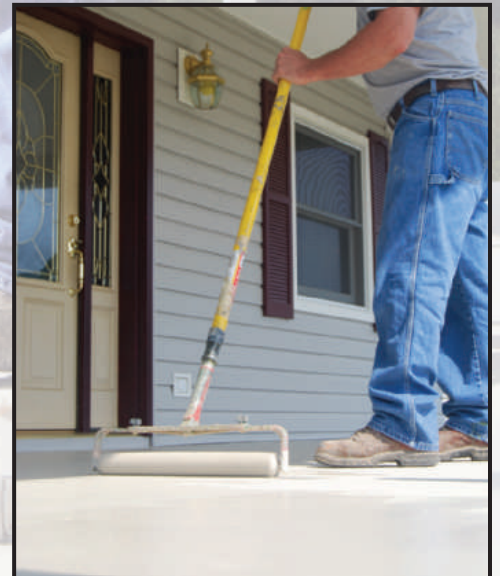

- Easy to apply
- Hardens fast
- Freeze-thaw resistant
- Trowelable for patching, filling or sloping
- Use to reform steps or curbs

ARDEX CG™

Concrete Guard

A high-performance, high-solids acrylic sealer for uncoated concrete toppings. ARDEX CG is a very durable sealer that reduces water penetration into the concrete. Available in Clear, Gray and White/Tintable Base. The White/ Tintable Base can be colored to match virtually any color. The tinting can be done through your local paint supplier using standard pigments for waterborne acrylic sealers, such as Sherwin-Williams’ Blend-A-Color or similar.

- Easy to apply & quick drying
- Durable & abrasion resistant
- Non-flammable/UV stable
- For exterior or interior use
