

Snaps together quickly and easily, saving time and money!

SANIGRID II

fiberglass ceiling grid system

Sanigrid is an all-fiberglass ceiling grid system that will resist moisture in high humidity and chemical environments.

Sanigrid will not rust, pit, dent, or peel like metal grid systems and it is very easy to install.

The new Sanigrid II system uses a series of pre-notched main tees and cross members to lock the grid together. The entire system snaps together quickly for faster installation.

Sanigrid works best with Glasbord® frp ceiling panels. These panels are engineered for lay-in ceiling applications to prevent sagging. Glasbord panels are the only frp panels with the exclusive Surfaseal® finish.

Sanigrid II has not been tested for compliance with seismic ceiling grid requirements.

- ✦ **Won't rust, dent, chip or peel**
- ✦ **Snaps together quickly & easily**
- ✦ **Moisture & corrosion resistant**
- ✦ **Meets USDA/FSIS requirements**
- ✦ **Class A fire rated per ASTM E-84**

For best results, use SANIGRID II with GLASBORD frp ceiling panels
