ARDEX X 3™ Thin Set Mortar
For the setting of ceramic and quarry tile, and concrete and natural stone tiles and slabs (with the exception of moisture-sensitive stones) on interior and exterior cementitious surfaces. Also for setting porcelain tile and glass mosaics on interior applications only.

For the installation of suitable building boards, e.g. gypsum drywall and cement backer board, insulation boards made of rigid foam, and installation of ceiling and sound insulation panels.

Product Capabilities:
ARDEX X 3 is a Portland cement-based mortar modified with powdered polymers for good bond strength and flexibility. When mixed with water, the result is a creamy, smooth thin set mortar that hardens by hydration and drying, is highly flexible and water and weather resistant. ARDEX X 3 bonds to common substrates to include concrete, masonry and cementitious surfaces, as well as drywall and backer board.

Benefits:

- Latex-modified Portland cement-based thin set mortar in accordance with ANSI A118.4
- Flexible
- Water and frost resistant
- Use for setting ceramic and quarry tile, and moisture-insensitive natural stone tiles
- Use for setting porcelain tile and glass mosaics on interior applications over absorbent concrete surfaces
- Easy to mix and apply
- Extended pot life
- Use for interior and exterior floors and walls
