

Engineered Custom Control Panels

SJE-Rhombus designs and builds custom solutions for control, pumping and monitoring systems. **Built to your individual specifications**, our services encompass functional specification development, design and configuration, thorough documentation, system assembly, start-up assistance (as requested) and exceptional customer support.

From control panels utilizing inventoried components to deliver competitive pricing and lead times, to complex systems integration, we have the knowledge and expertise to provide what you need, when you need it.

Typical Applications:

- Lift stations (sewer, stormwater, leachate)
- Grinder stations
- Recirculation systems
- Pressure booster systems
- Hydroneumatic systems
- Aerobic treatment
- Well pump control
- Condensate return
- Irrigation systems
- Process control
- Dewatering

Available Features:

- Variable Frequency Drives (VFD)
- Telemetry/SCADA
- Reduced voltage starters
- Service entrance rating (UL)
- Programmable Logic Controllers (PLC)
- Battery-backed alarm systems
- Multiple pump control applications
- User specified components

UL Listing for Control Panels:

- UL/cUL 508A
- UL/cUL 698A is available for panels with circuit extensions into hazardous locations
