

Engineered Custom Systems

SJE-Rhombus Controls designs and builds custom solutions for your control, pumping and monitoring systems. **Built to your individual specifications**, our services encompass functional specification development, design and configuration, thorough documentation, system assembly, and exceptional customer support. We have a strong team of dedicated engineers and technicians that will prepare **comprehensive quotes** and **detailed submittal packages** tailored to your requirements.

From panels utilizing inventoried components to deliver competitive quotes and lead times, to complex system integration, SJE-Rhombus has the knowledge, versatility and expertise to **deliver *what* you need, *when* you need it.**

Typical Applications

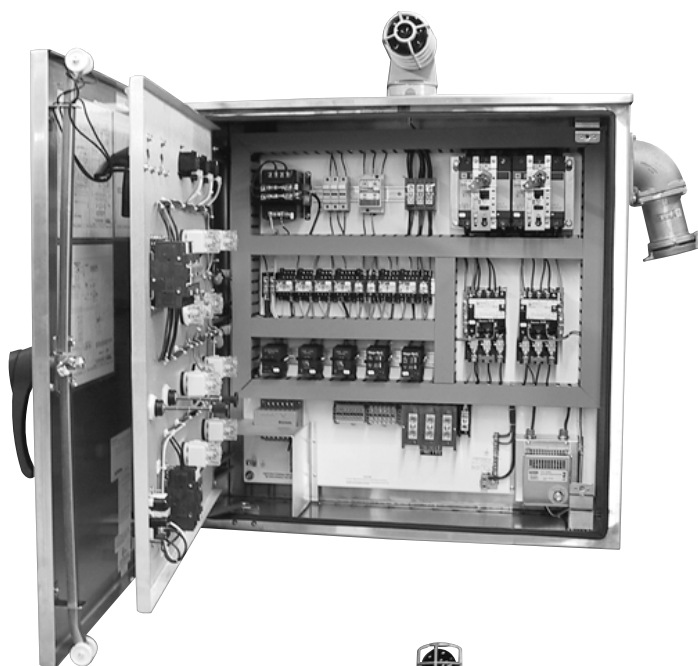

- Lift Stations
- Grinder Stations
- Recirculation Systems
- Pressure Booster Systems
- Hydropneumatic Systems
- Aerobic Treatment
- Well Pump Control
- Condensate Return
- Irrigation Systems
- Leachate Pump Control
- Process Control
- Storm Water
- Dewatering

Available Features

- Variable Frequency Drives (VFDs)
- Telemetry/SCADA
- Reduced Voltage Starters
- Service Entrance Rating (UL)
- Programmable Logic Controllers (PLCs)
- Battery-Backed Alarm Systems
- Multiple Pump Control Applications
- User Specified Components

SJE-Rhombus is a UL Listed panel shop.

UL 508A Listing for industrial control panels or **UL 698A Listing** for enclosed industrial control panels with circuit extensions to a Class I, Division I, Group C, D hazardous location.
