# Terminal Adaptor
Model 956

■ Accepts Bare Wire, Spades or Banana Plugs

■ Gold Plated Connectors

■ Suits TTI-7 or TTI-22

Our TTI range use high quality 'Lemo' connectors for the Pt100 inputs. This simple accessory provides 4mm Terminal Posts for the connection of bare wires, spade terminals or 4mm plugs - useful if a lot of probes are going to be used with the instrument.

The adaptor connects to the TTi via two flexible cables, terminated with the appropriate Lemo connector.

There are two models, one for the TTI-7 and the earlier TTI-6 and a second for the TTI-22.

Specifications

Dimensions	Height 68mm (including feet)
