Audio Distribution System

The Liberty Audio Distribution System delivers whole home audio from one or four sources to four or eight locations.

Since the amplification is done after the receiver, at the volume control, it permits true individual volume and source control at each location.

Liberty Audio Distribution: Unlike other structured wiring systems on themarket that accept only one audio source for distribution via CAT5 throughtout the home, the Liberty system distributes four different audio sources to four or eight zones in the home. Individual volume controls allow the user to bypass any of the four audio source.

Audio Distribution Module

Part No.	Audio Sources	MAX Location	DC power Input	Input Connector	Output Connector	Dimension Length x Height	Infrared Control
HAA-1404	Four	4	12VDC	Terminal Block	110 IDC	6.3"x3"	No
HAA-1408	Four	8	12VDC	Terminal Block	110 IDC	6.3"x3"	No
HAA-1404IR	Four	4	12VDC	Terminal Block	110 IDC	6.3"x3"	Yes
HAA-1408IR	Four	8	12VDC	Terminal Block	110 IDC	6.3"x3"	Yes

Stereo Volume Control

Part No.	Output Power	Speaker Impedance	Line in (3.5mm Local component socket)	Audio Source Selector LED Display	Volume Control	Infrared Control
SV-60	5W+5W	8 ohm	Yes	Yes/4 Source	Continuous	No
SV-60IR	5W+5W	8 ohm	Yes	Yes/4 Source	Continuous	Yes
SV-61	5W+5W	8 ohm	Yes	Yes/4 Source	Continuous	No

ISK-358	Stereo Wallplate Connector	Must be used for Stereo Line Level input
