

AMP IT UP!

Page 14

The revolutionary new a-live® audio distribution system is finally here! The commercially focused 70V version (A6X6A70) lets you run more speakers a longer distance, than just about any other multi-source/multi-zone system on the market. The unique networking capability lets you stream your digital music collection separately to each zone, without taking up any of the 6 source inputs. There is also a residentially focused 8 Ohm version on page 43.

Page 15

Our new PL200M is a 4 zone, 5 source distribution amplifier with 50 watt power per zone. It's ideal for settings where separate sources are needed in different areas simultaneously from the same amplifier.

Page 16

Our PL60SA and PL120SA amplifiers make 70V stereo a reality. We are raising the bar for sound fidelity in commercial establishments, especially those that demand a better sound atmosphere for premium subscriptions.

Page 17

Our PL260A is a high-power distribution amplifier ideal for any commercial setting where controlled paging to multiple zones is desired.

Page 18 & 19

Our space-saving FACD Amplifiers combine a CD player and tuner and a power amplifier into one value-packed box. With output to up to 5 zones, telephone paging interface and music-on-hold capability, these amps are a commercial installers dream come true.

Page 21

Our Professional Series (featuring the P40A) amplifiers mean business. They are designed with budget, performance and ease of use in mind.

Page 23

Our PAW80A portable amplifier combines power, convenience and value into one great looking, rechargeable package. It also comes complete with 2 wireless microphones (1 lapel and 1 handheld) and a built in CD player.

Didn't find the exact amp you were looking for above? The following pages are packed with a variety of power, mixer and packaged amplifiers that are sure to complete any installation. There's a good reason Speco Technologies is considered *THE* amplifier company.
