Length: 8.5 in. | 21.59 cm

### 1 AGGRESSIVE

The open-tooth design of the saw resists filling up when working in damp or sappy environments.

### 2 STRONG

Stainless steel bypass pruners can cut materials up to  $\frac{3}{4}$ " in diameter.

### 3 UNIQUE

Rotating and locking handle gives you quick, easy access to the tools you need.

### 4 AMBIDEXTROUS

Pruners can be locked just as easily using your left-hand as your right.

### 5 DOUBLE-TIME

Sprinkler head adjustment key works on all major brands and doubles as a flat screwdriver.

### 6 SHARP

Leatherman blades are known for their extremely sharp edges and the 420HC stainless steel pruner head is no exception.

## 25-YEAR WARRANTY

Leatherman Tool Group, Inc. proudly stands behind our products. If you ever have a problem with a genuine Leatherman tool, you can count on us to make it right with fast warranty service for a full 25 years from the purchase date.

## GENUS™ PROFESSIONAL-GRADE PRUNER

Take everything you know about professional pruners and turn it on its head. Or in the case of the new Genus™ from Leatherman...Rotate it. These new pruners feature an industry-first: A rotating handle that stores a full set of professional tools. Just push the button and flip the handle around and you'll find a knife, Phillips screwdriver, sprinkler head adjustment tool/flat screwdriver, bottle opener and very aggressive saw.

## NOW YOU'RE READY

When pruning is all you need, the tools are neatly tucked away and the comfort-sculpted design makes acres of work feel like inches. The heat-treated, anodized aluminum body gives Genus the optimum balance of weight, durability, and corrosion resistance. The 420HC stainless steel tools and pruner give it the strength to be called a Leatherman.

## ACCESSORIES

Included with this professional-grade pruning tool is a diamond-coated that doubles as an open-end wrench to adjust the pruner nut when necessary. With all these features, replaceable cutting blades and spring, heavy-duty nylon sheath, and because it's backed by legendary Leatherman engineering and quality control, this may (unfortunately for us) just be the last landscaping tool you ever need to buy.

## THE LEATHERMAN DIFFERENCE

Leatherman is known for producing the world's most precisely engineered multi-tools and knives; our manufacturing standards remain unmatched in the industry today. With the new Genus™ the Leatherman tradition of innovation, tight specifications, and premium materials continues to endure. Our expertise doesn't end with our products—it also shows in our service. Competitive pricing, prompt delivery, excellent customer service and outstanding warranty support round out our dedication and commitment to you.

Pruner adjustment wrench and diamond-coated file comes with Genus
