Custom Decora-Style Inserts & Plates

Inserts provide both form and function

A project's small details are often the most noticeable to your customers and are a constant reminder of your quality standards.

Your customers expect an elegant and well-designed AV installation to have a unified look and appearance– especially when it comes to the small details of the project like wall plates. Customers expect all AV plates to match the look and feel of the electrical plates and switches in the installation. Designed to blend in perfectly–in either a residential or commercial environment– Liberty's new Decora-Style inserts

and blank plates match industry-standard colors: Almond, Ivory and White.

Now providing your customers with a complete solution of color-matched customizable Decora-Style plastic inserts and our revolutionary customizable blank plates options have never been easier...or more profitable.

Liberty's Decora-Style inserts and blank plates are available in a variety of standard options populated with connector sets commonly requested by AV professionals.

EZLINX™ Termination System

Whether you are working on a commercial or residential installation, Liberty's EZLINX™ system is the simplest way to connect to any connector set on almost any electronic device ranging from Plasmas, DVDs and more.

Our patented solution uses a 13-Pin Din connector on one end which terminates with a broad selection of termination options on the other end including VGA, BNC, RCA, Analog DVI, S-Video, XLR and 1/4" stereo connectors.
