

The Fast and Easy Solution for Conduit Installations

Save time and money on challenging installations with Liberty's proprietary EZLINX™ Termination System. This quick-connect solution, for A/V wiring, features the exclusive EZLINX component: a simple, fail-proof locking device that connects EZLINX cable with 14 termination options on either end — eliminating labor-intensive on-site terminations. Add the convenient EZLINX metal pull-cap for rapid installation, and you have a customizable connectivity solution that assembles quickly under the toughest field conditions.

The EZLINX termination system provides a complete solution for connecting cable to your device-to-device and device-to-control applications. Regardless of the connector style, EZLINX allows the professional AV installer to finish the installation simply, easily and efficiently.

Liberty's EZLINX system is comprised of two basic parts:

- The EZLINX cable, a 26 AWG with a threaded 13-pin female connector on each end
- 14 EZLINX Termination Options with a threaded male connector on one end and a broad selection of high-quality VGA, BNC, RCA, Analog DVI, S-Video and customizable options on the other

Liberty's EZLINX male-to-male cable adapters are the perfect solution for longer distances, and for shorter distances, our flexible termination options can be easily connected with our female to female cable adapter.

EZLINX solutions are also available in both a plate and panel-mounted style, providing the professional AV installer with the ultimate in complete connectivity.

The Complete Solution

EZLINX connections are available in both plate and panel configurations which allow the total system to be completely integrated into the environment.

Our plates and panels are available in a broad assortment of VGA, BNC, RCA, Analog DVI and S-Video connector options. Liberty's stock plates and panels are offered in brushed aluminum, black, white, ivory and non-brushed aluminum. Custom colors, wood-grain matching and PMS colors are also available. Call us today for details.

EZLINX metal pull-cap

EZLINX™ CABLE

Available in a variety of lengths, the 26 AWG Linx cable is easily pulled through conduit and uses a simple-to-use, fail-proof locking device to connect either end to a termination.

Length (ft.)	Connection	Part #
3, 6, 10, 25, 35, 50, 75, 100	13-Pin EZLINX Female to 13-Pin EZLINX Female bulk cable	EZ-LINX

EZLINX™ ACCESSORIES

Length (in.)	Connection	Part #
10	13-Pin EZLINX Female to 13-Pin EZLINX Female adapter	EZ-LINX-ADAPTER
	Male to Male, connects two EZLINX bulk cables	EZ-ADAPTER-M
	Female to Female, connects two termination option cables	EZ-ADAPTER-F
	EZLINX metal pull-cap for cable pulling and end protection	EZ-LINX-CAP

EZLINX™ TERMINATION OPTIONS

Connect quickly and securely to a variety of termination options

The robust EZLINX system provides 14 termination options that include VGA, BNC, RCA, S-Video and analog DVI connectors. Or, if you have special applications, Liberty can customize a solution to fit your needs.

MOLDED RCA CABLES

Molded RCA connectors are constructed for optimum contact between plug and jack. Available in 3 and 5 conductors, with both male or female ends.

Length (in.)	Connection	Part #
20	5 RCA Male to 13-Pin EZLINX Male	EZ-5RCAM
20	5 RCA Female to 13-Pin EZLINX Male	EZ-5RCAF
20	3 RCA Male to 13-Pin EZLINX Male	EZ-3RCAM
20	3 RCA Female to 13-Pin EZLINX Male	EZ-3RCAF

All EZLINX products have a low insertion loss of < 0.2 dB

RCA option EZ-5RCAF shown

The leads on EZLINX termination (molded assembly tail options) are 10 inches in length.
