▲ Each eight button remote control arrives labeled and pre-programmed with each button tied to a customizable Intelix Audisey Athena software preset.

Each remote control fits in a standard single-gang wallbox with a standard decora plate. ▼

◀ Each remote control includes 24 button caps for custom labeling.

To adjust the remote control's programming, simply reconfigure the system preset in the Intelix Audisey Athena Designer Software. System presets may include input Digital Signal Processing (DSP) and output Digital Signal Processing presets. ▼
