BORN IN PORTLAND, OR

Leatherman is more than 400 employees strong and we use our products for everything we do here. If you ask our maintenance crew they'll tell you we use them on the job as much as they *are* the job. From hunting and fishing, to mountain biking, skiing, or an afternoon in the garden. From DIY to "Did you remember the gear bag?", we employees test our products to meet the high standards of our own pursuits, so ultimately they live up to the customers'.

THE NO-DOWN-TIME WARRANTY

One of the best in the business, our 25-year warranty is based on a policy of no-questions-asked. If a customer brings or sends us a tool with a problem, we'll make it right. Simple as that. And unlike most warranties ours doesn't take 6-12 weeks to honor, because everything is taken care of right here in our Portland, Oregon manufacturing facility. Customers will be up and running again in a matter of days, not weeks. For the folks who use their Leatherman on the job, and there are quite a few, this is a real bonus.

PLENTY OF POWER IN TIGHT SPACES

Larger pliers are the strongest we've ever produced and they give you more power to put some serious torque on your toughest jobs. The sloped-top handle design means you can maneuver your pliers further into tight spaces than any tool we've ever made.

INTUITIVE COMFORT-GRIP HANDLES

Rolled handle edges are comfortable in the hand, even when you're giving it everything you've got. And with large cut outs on the side of the handle make it easy to get components out—even with gloves on!

THREE WIRE CUTTERS

Stranded, hard and regular wire cutters all come standard on Super Tool 300.

NO MORE DOWN TIME

Removable wire cutter inserts let you repair or re-sharpen on the spot with the tool's file. Additional wire cutter inserts, screws and adjustment screwdriver (Torx #8) for replacement, sold separately.

BLACK OXIDE SUPER TOOL® 300

Take our hardest working tool and dull it down? You bet. The Super Tool 300 is available in a black oxide version for those in work that demands strength and stealth. The black oxide version features all the same specs as the regular Super Tool 300 with the addition of cap crimpers in the jaws. Instead of the standard nylon/leather sheath, this version comes with a nylon MOLLE sheath.
