Why OFC is Better

When audio signals move through a normal piece of copper cable they encounter layers of copper crystals which act as a barrier reflecting and degrading the signal. OFC copper reduces the amount of crystals in the copper for a clearer signal.

Regular Copper - Impedes Signal

OFC Copper - Better Signal

ExtraFlex™ Premium Speaker Cable Non-Plenum

- Best selling speaker cable
- Oxygen-free Copper (OFC)
- High strand counts
- Extra thick extruded PVC compound outer cable jacket
- Extremely flexible
- Perfectly round
- Jacket keeps conductor twists in place to protect the sonic fidelity
- Exceptionally easy to pull
- Designed for heavy duty distributed audio applications
- UL listed NEC type CL3 or CM
- Available in 6 colors

AWG/Conductors	Stranding	Color	Put-up	Part#
