

MWH SERIES PISTON TYPE WATER HAMMER ARRESTORS

**MWH
SERIES**

- Thick walled one piece, seamless "K" copper body. Unique design eliminates separate end cap connection to ensure maximum integrity of the body and guarantees free movement of the piston for maximum performance.
- RYTON™ PPS piston with two EPDM o-rings (Parco#5778-80) with FDA(Dow Corning™#111) approved silicone lubricant. Ribbed piston design reduces secondary shock and flared piston skirt prevents hard particles suspended in the water supply from contacting the o-rings to provide increased product life.
- Large volume air chamber provides better dampening for superior water hammer arrestor performance.

NOT RECOMMENDED FOR INSTALLATION IN HORIZONTAL OR INVERTED POSITION

- Temperature range: maximum working temperature is 250 °F
- Operating pressure: Water hammer arrestors are engineered for a flowing pressure of up to 60 p.s.i. If the system pressure exceeds 85 p.s.i., a pressure reducing valve should be installed upstream of the arrestor to lower the line pressure.
- Engineered to limit the system surge pressure of 1,500 p.s.i. Tested and certified to the A.S.S.E. 1010 and ANSI A112.26.1M Standards and listed with I.A.P.M.O. **Patent # 6,539,976**
