

MI-100 ENCLOSED ELECTRONIC TRAP SEAL PRIMER

ELECTRONIC TRAP SEAL PRIMER

Bundling Category #1

MI-100 ENGINEERED FOR EQUAL DISTRIBUTION AT ALL PORTS

The perfect solution to keep sewer gas from entering the building from seldom used floor drains. The MI-100 can be located anywhere in the water supply and is engineered to permit the building owner to adjust the frequency and amount of water delivery through a timer and solenoid valve. An engineered distribution manifold ensures that a minimum of 2 ounces of water are delivered equally to every port over a twenty four hour period. The unit must be mounted 12" above the finished floor for every 20' of trap water line. The MI-100 can be installed with a MIFAB MI-100-AD access door. It can be installed up to 5° out of plumb. The system is capable of priming from 1 to 32 floor drain traps. The MI-100 is practical to serve many floor drain traps in infrequently used buildings such as convention centers and sports facilities. The MI-100 may be installed flush or surface mounted.

Model Number	Description	List Price	Shipping Weight (lbs.)
MI-100-4	1-4 opening distribution unit w/ flush mounted box	\$1,416.00	25
