# DATA COMMUNICATION

RFM relay floor mount

Two sets of 11-gauge rack rail incorporated in to a 16-gauge steel top and bottom allow simple assembly of our RFM racks. Channel stiffeners are supplied, adding strength to this self-squaring unit. Rails tapped for 10-32 standard rack screws. Available in sizes from 24 to 42 rack spaces. Rack rated at 145 pounds. Fifty rack screws provided. Finished in black powder coat.

RCM cable manager

Cable manager mounts to either side of, or in between, two of our Relay Floor Mount racks allowing abundant room for cable passage. The channel measures a generous six inches wide by four and a half inches deep with easy access from the rack. The cable manager comes in twenty rack space (36 inch) sections. The covers are easy on-easy off with quarter turn slotted head fasteners.

| Model	Panel Space	Depth	Width	Height

ECR-ST steel elite converta rack

Raxxess has incorporated all of the features of our very popular ECR series of racks into an all steel version. Extremely rugged and secure, the ECR-ST has greater capacity than its counterparts. Below the key lockable and retractable steel top is a 12 rack unit mixer section that can be moved to any of 8 different positions, from 0-45 degrees. Below it, and behind another key locked, steel door, is a 16 rack unit section for mounting electronic components. Like the front door, the locking steel rear door also features abundant slotting for passive ventilation when the unit is closed. Extra heavy duty casters are included. The ERT-ST is finished in durable silver and black powder coat. Adjustable rear rack rail optional.
