

ArtScreen designer is a free tool available on the Vutec website, allowing consumers to select and preview the look of an ArtScreen from the vantage point of the choice artwork, liner, frame....and even color and texture of the wall/backdrop for the ArtScreen.

In addition to seeing their choices of frames, liners and art reproductions on the ArtScreen Gallery, shoppers can also upload their own images of art onto the designer tool for customized purposes.

Transform Any Flat Panel TV Into a Finished Framed Product and a Stylish Room Accessory

SCREEN**
SYSTEMS BY VUTEC

ArtScreen

Art Meets Technology in one product. With one touch of a remote, ArtScreen transforms your LCD, Plasma or Video Projection Screen into a breathtaking work of art that enhances the décor of any room.

Inside an elegant hardwood frame, an ultra-quiet motor raises or lowers a museum quality Giclée canvas print - a quality art reproduction that looks virtually and amazingly like the artist's original.

When the television or screen is not in use, the artwork of your choosing is displayed within the frame. When the artwork is retracted, the video display is visible for viewing.

Our galleries display a vast choice of artwork reproductions, frame styles and liners. Visit our website at www.vutec.com to select from hundreds of fine art reproductions.

Family portraits, personalized art or custom artwork can be reproduced to create an individualized or captivating work of art.

Both recessed and surface mounted versions are available to complement any interior design or décor.

ArtScreen is available for video displays from 32" to 110" diagonal. All orders are custom made.

R-SERIES BY VUTEC

ArtScreen R-Series

R-Series includes a programmable remote controlled robotic arm; allows user to preset the viewing angle of flat panel display eliminating undesirable glare or reflection; and with tilt up/down swivel range, provides mounting location flexibility while maintaining optimum viewing.

ArtScreen R-Series is available in standard display sizes for Plasma and LCD televisions from 40 inches on up. Custom sizes can also be accommodated.

Light control not critical

Vivid color reproduction

Vutech's patented High Gain (6.0),
High Contrast/Definition front projection screen.

"I am absolutely BLOWN AWAY by SILVERSTAR.
I highly RECOMMEND it!"

John Orloff

"Emmy nominated Hollywood screen writer for
"Band of Brothers" and "A Mighty Heart"

Designed for native 2.35:1 or 16:9 projectors

Horizontal or Vertical masking panels

Quiet electronics through intelligent motor control system, achieving an optimum shadowless viewing experience with no space between the masking panels and projection screen surface.

Combines Vertical Masking System with a fixed height that automatically becomes 16:9 for anamorphic lens projectors.

Combines Horizontal Masking System with a fixed width that automatically becomes a 2.35:1 CinemaScope (movies) aspect ratio

Theater Art Systems with Masking

Theater Art Systems with Masking is the undedicated home theater system providing the versatility so much in demand today. Adaptable for virtually any room - Great Room, family room, living room, bedroom or den - it transforms a standard video projection screen with masking into a work of art.

This advanced screen/art/masking system for the undedicated theatre can incorporate the SilverStar™ 2.35:1 or 16:9 dual aspect high definition-high gain front projection screen, with vertical or horizontal masking system. A motorized Giclée canvas

artwork covers the screen completely, transforming it into a framed work of art on the wall when not in use. Many sizes and an almost unlimited choice of art is available. Theater Art Systems with Masking truly meets the changing needs of home theater enthusiasts. A choice of screens is also available.

Theater Art Systems with Masking, a winner of the 2008 Electronic House Product-of-the-Year Award.

SYSTEM BY VUTEC
CINESCAPE SERIES

ArtScreen CineScope transforms a video projection screen into a work of art. Inside a beautiful hardwood frame, the artwork ascends or descends with the touch of a remote. When the screen is not in use, the digital art-on-canvas image of your choice is displayed within the frame. When your artwork is retracted, the video display is visible for viewing.
