

Nonmetallic Safety Cans offer reliable dispensing for even the most corrosive liquids.

Nonmetallic Laboratory Safety Cans have all the benefits of Justrite's Type I polyethylene safety cans, with the addition of a self-closing faucet for easy dispensing. All fill spouts have a pressure relief cap with stainless steel flame arrester. Top of can features stainless steel hardware for maximum corrosion resistance and long life. Five gallon sizes also feature a vacuum relief valve in the lid for smooth liquid flow. Justrite's unique patented, current-carrying carbon insert imbedded into the container allows for proper grounding (see page 58 for example).

Nonmetallic Shelf Cans have a faucet that is mounted two inches above the bottom to eliminate lifting the cans during dispensing.

Nonmetallic Tilt Cans have faucet on top and the can rests in a sturdy metal cradle.

Leading the Advancement of Safety

MARKET-LEADING IDEAS

The first manufacturer to introduce polyethylene safety cans in the market, Justrite continuously leads the way in offering new products to meet the changing demands of your workplace.

5 gallon (19L) polyethylene Safety Can with self-close Brass Top Faucet 08540	11 1/2" x 17" (292 x 432)	FM	14540 New

Dispense from a safety cabinet with ease.

Dispensing Shelf allows easy dispensing of liquids from a faucet without having to adjust the can's position on the shelf. Because the shelf is 11" (279mm) deep, it allows the faucet to protrude beyond the shelf so the user can place a vessel beneath it and dispense safely.

Dispensing Shelf

Description	Dimensions W x D (mm)	Model No.
Dispensing Shelf, for use with 30- and 45-gallon Cabinets	39 3/8" x 11" (1000 x 279)	29943
