

# Superior Eco-friendly Solutions

Drum handling and spill control products are molded from dirt hiding, eco-black 100% recycled polyethylene and high visibility, virgin yellow polyethylene. Nearly impervious to chemicals, including acids and corrosives, these poly solutions offer durability and long-lasting value.

## Spill Control Pallets

Fully compliant pallets are the recommended choice for hazardous liquid drum storage. Large sump offers secure protection against spills and exposure.

Page 96

## Accumulation Centers

Low-profile accumulation centers are the economical solution to spill concerns during drum filling and dispensing operations. Modular configurations can be joined to increase sump capacity.

## Steel Spill Pallets

Industrial strength spill protection.

Page 97

## Spill Trays

Small scale spill protection.

Page 99

## Drum Management System

Double storage capacity with a drum management system. Large open-view sump offers positive spill control, easy clean-up and safe liquid dispensing.

Page 101

## Drum Caddy

Dispense, store and move heavy drums with this versatile solution to single drum handling. Large open-view sump provides EPA compliant spill protection.

Page 100

## Collection Centers

Collection centers are the perfect solution for small quantity storage, indoors or out. All units are forkliftable for easy relocation.

Page 102

## Salvage Drum and Overpack

Versatile units for overpacking of damaged containers, collection and transport, emergency response, and cleanup of contaminated sites.

Page 103

## Spill Control Funnel

Large capacity funnels provide a simple, cost-effective way to collect liquids and keep drum tops clean. Optional flame arrester is available for flammable liquids.
