

Titus will introduce the latest addition to the T₃SQ family, the Digital option of the T₃SQ. Titus brings both accuracy and flexibility to the variable air volume (VAV) market with T₃SQ VAV diffusers. The T₃SQ combines the functions of a VAV terminal and a high performance diffuser in one by modulating the air volume delivered to a zone to accurately control cooling and heating conditions. This results in maximum air distribution effectiveness at any air flow, for superior comfort conditions.

DIGITAL T₃SQ

MODELS AVAILABLE:

- Standard Master Communication module
- Master Communications module with Lonworks gateway
- Master Communications module with BACnet gateway

Titus, The Leader in Air Management has an HVAC solution for any application. Whether it is a ceiling installation or an underfloor application, Titus has the products to meet your needs. Contact your local Titus Representative for more information.
