

## Stationary measurement engineering

### Experts are our favourite customers

Dettel Higgelke,  
Head of the  
Testo Academy

...because they know what they are doing. We offer you our support with our field-oriented trainings on measurement procedures, stipulations and on physical cohesions.

Even more important is the exchange with other specialists from your branch. After all, we are dealing with your competence and your professional routine when using our instruments.

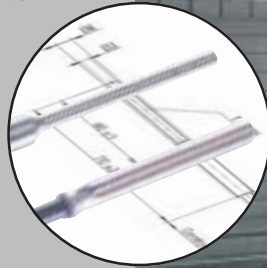

By the way: 98% of our training participants fully recommend our seminars and training.

hygrotest humidity transmitter

Trace humidity measurement in compressed or dry air with testo 6740

Stationary probes, custom-designed special probes, individual complete solution

Logging of current and voltage during production processes with testo 175-S2
