

Climate Control™ Zoning
Wireless Thermostat

An innovative home comfort system that installs quickly anywhere with wireless technology

Wireless control of home comfort

The Zoning System's exclusive wireless capabilities make it one of the easiest systems to install — the thermostats require no wiring.

Plus, temperatures can be controlled from the comfort of an easy chair, introducing a new level of convenience to home comfort.

Zoning control lets homeowners manage temperatures in different areas of their home. Positioning the heat exactly where they want it creates efficiencies along with customized comfort.

Wireless control provides even greater flexibility. This system from the Climate Control line of home comfort products lets homeowners place the thermostat wherever it's most convenient — mounted to the wall or sitting on a table.

Thermostat (T-75), silver

Uponor offers you a competitive edge

Because the Zoning System requires no hardwiring, it's an ideal solution for retrofits and remodels. Installation in new construction is also extremely easy and quick. You can recommend and install this reliable, long-lasting, low-maintenance system without worrying about callbacks.

Exclusive wireless zone control lets you offer your customers advantages they can't get from any other home comfort system. Homeowners can adjust comfort levels without leaving their seat or moving across the room — all with a compact, attractive and user-friendly thermostat.

Interface (I-75)

The benefits of the Climate Control Zoning System

Wireless technology offers placement flexibility and easy installation — no thermostat wiring necessary.

- ~ Provides exclusive wireless zoning capabilities
- ~ Operates up to 12 thermostats and 14 actuators per control module
- ~ Operates at low voltage so you can install the system yourself, saving time and subcontractor fees
- ~ Features a clean, contemporary design, appealing to homeowners
- ~ Eases setup and configuration with a simple five-button control
- ~ Uses state-of-the-art wireless communication technology to ensure consistent signal quality

You're backed by Uponor

Our partnership with you goes beyond providing the industry's best products. Extensive, hands-on training gives you the expertise you need to install Uponor products and systems with confidence. And our network of trained sales and service personnel offers you further support, assisting with systems design, bid preparation, installer certification and on-the-job questions.

We are deeply committed to this partnership. Because we understand that our success depends upon your success.
