# Now one control can support multiple functions with plug-and-play simplicity.

## The Climate Cöntrol Multifunction does the job of six controllers.

- Eliminates the need for multiple controls
- Increases functionality without adding cost
- Simple plug-and-play connections, eliminating wiring confusion
- Low-voltage platform (24V)
- One controller can control multiple proPANEL® units, decreasing product and installation costs
- Fewer replacement parts
- Intuitive, 5-button interface for easy setup and viewing
- Fully programmable with multiple built-in functions
- Cat5 connections and wires

## Introducing the Uponor Climate Cöntrol Multifunction Controller.

Simple, intelligent and intuitive, the Climate Cöntrol Multifunction hydronic controller is designed to do everything better. It replaces all six of our previous pro Series models, and is made to run multiple proPANEL pumping and mixing units with incredible ease. A single device now performs multiple functions, like domestic hot water (DHW) control, mixing, snow melt and more. It's one box, with one wiring schematic, one setup and one easy, plug-and-play way to install.

## Drastically reduced installation times.

We've replaced conventional thinking with something we call Uponor Logic. That means the new Climate Cöntrol Multifunction hydronic controller has been completely re-engineered to be simplified, streamlined and intuitive. With Cat5 wiring, instead of multi-strand thermostat wire, and a portable data stick that stores upgrades and system configurations, installation and setup can be done in a fraction of the time it used to take.

## Less expensive, because one unit does it all.

One Multifunction Controller is better than a multitude of old-fashioned controls because it's one simple installation, reduced materials and labor costs, even fewer replacement parts. A single Climate Cöntrol Multifunction hydronic controller can be used for:

- Zone pumping
- Single or multiple mixing
- Boiler control
- Boiler staging
- Multiple water temperatures
- Domestic hot water (with or without priority)
- Snow melting (semiautomatic and fully-automatic)

## Uponor Logic. Also known as peace of mind.

Uponor Logic is a unique approach to analyzing problems and providing solutions. It's our comprehensive analysis, stringent engineering and rigorous testing that ensures our products and systems are the best, most reliable, intuitive and intelligent available today.

- Uponor is a leading international supplier of radiant heating and cooling, plumbing and fire sprinkler systems.
- With more than 30 years of proven performance, Uponor delivers comfort and peace of mind to millions of homeowners in 100 countries around the world.
- We believe in sustainable building and use materials, practices and packaging that are designed to minimize our impact on the environment.
