

# MATS & RUGS

CLEAN, DRY FLOORS PREVENT SLIPS, TRIPS & FALLS

## Mats & Rugs

SPC absorbent mats and rugs keep aisles and walkways slip-free by absorbing and containing oils, liquids or other spills. They are designed to hold up in your toughest applications and are ideal for high traffics areas and workstations. Compared to an entrance mat, absorbent mats and rugs offer better traction, reduce slipperiness and keep liquids from being tracked from one area to the next.

### Common Liquids Absorbed:

- Bases
- Oils
- Chemicals
- Solvents
- Water-based fluids

## The Technology:

SPC absorbent mats and rugs are constructed from durable, needle punched, polypropylene fibers - a more durable manufacturing process with a larger fiber diameter than meltblown fibers. This technology means that fibers or absorbent materials will not come loose around high traffic areas or workstations.
