OFFICIAL JAWS OF LIFE® WEBSITE

The Jaws of Life® website – www.jawsoflife.com – is a valuable research tool for rescue professionals. Whether you want to learn more about Hurst® rescue tools, your nearest dealer, service, or the Green Cross program, it provides a wealth of information at your fingertips. If you would like to speak directly to a Hurst® customer representative, please call 800-537-2659.

Mini Lite Tools

The Mini Lite tool series is the perfect solution for confined space rescues. Lightweight and extremely portable, these tools can be used with either a manual pump or a DC power unit. Sold by the piece or as a set, the Mini Lite tools are stand alone rescue systems.

HURST
JAWS OF LIFE®

PIONEERING BRANDS

Throughout the world, the name Jaws of Life® has become synonymous with saving lives. For well over three decades, this name clearly has set the standard for power, dependability and life-saving performance. As the pioneer of the world's first rescue tool, the company decided to appropriately label these products "Jaws of Life" because they snatch victims from the jaws of death.

Today, only one brand can proudly claim being a part of the Jaws of Life® family. Hurst® and Hurst® High Pressure are the only authentic Jaws of Life® brands. Together, these brands offer the world's most complete line of hydraulic rescue tools, power units, air bag safes and related accessories.

DISTRIBUTION STRENGTH

Hurst Jaws of Life® has built the strongest network of distributors in the industry, with numerous locations throughout the United States and Canada. These distribution partners provide excellent sales, service and training to fire and rescue departments, emergency services, military installations and government agencies across North America.

To schedule your personal demonstration and/or to speak with a sales representative, please contact your nearest Hurst® dealer, or visit www.jawsoflife.com to locate a dealer in your area.
