Chem-Flush Valve

Our new Control Blast blow-out gun puts you in control with our new trigger activated technology. This new device uses a new bigger and better 12 or 16 gram CO₂ cartridge. Stock up today! Do not use on a closed end line.

40428 (Standard blowout gun) and 40429 (Gun with 150 psi safety valve) blowout guns uses a CO₂ cartridge (sold separately) and incorporates a 1/4" NPT female connection, that can be adapted to other fittings. It is intended for use in blowing out clogged lines that are vented beyond the restricted point to the atmosphere. It should not be used in a closed end line. The blowout gun with the built in check valve allows the user the ability to remove used CO₂ cartridges without pressure line loss. You can then add additional CO₂ cartridges as needed, up to 150 psi.

Walker® Chem Flush Valve. This valve is required when using Chem-Flush - 1 aerosol P/N: 2001CF. The valve consists of a dispensing cap, flow sight tube, pressure gauge, pressure relief valve with a threaded portion for easy adaptation of a standard CO₂ gun.
