Multi-Viewer with Simple Matrix Switcher for Convenient Video Monitoring
Easily monitor and distribute input sources. View all sources on a single HD display.

**MULTI-VIEWER/SWITCHER MVS-12**

**MULTI-SOLUTIONS**

Multi-viewer and Matrix switcher function enables system expansion.

**INTUITIVE OPERATION**
Quick setup and operation with a mouse. Rearrange screen structure with simple drag and drop motion. Select video source with a click of the mouse.

**MATRIX SWITCHER**
Using the built-in Matrix Switcher function, 12 video sources are assignable to 4 different outputs. Use as a simple switcher.

**MULTI-VIEW**
There are four layout patterns to choose from. Aspect ratio, background color and source names can be selected from the MENU.

**MEMORY & CONTROL**
Four display setups can be saved and recalled from the 4 front panel memory buttons. In addition, the MVS-12 can be controlled from a PC via LAN or RS-232C.

**Monitoring for Switcher**
The MVS-12 is a perfect companion for the LVS-800 allowing you to preview all monitor outputs. Using a MIDI connection the PGM/PVM video source is displayed and indicated by a red frame and green frame (tally).

**Monitoring for Video Installation**
Video sources can be distributed to up to four different locations. The Matrix Switcher function enables the V-1600HD mixer to access additional SD inputs. By connecting a MIDI cable and using the V-LINK function, the V-1600HD can directly select any video source from the MVS-12.

**Expansion of SD Inputs**
The Matrix Switcher function enables the V-1600HD mixer to access additional SD inputs. By connecting a MIDI cable and using the V-LINK function, the V-1600HD can directly select any video source from the MVS-12.

Please note that the MVS-12 does not function as a multi-viewer for the V-1600HD. The inputs and formats of the MVS-12 and the V-1600HD are not directly compatible. The example is an illustration of standard definition input expansion for the V-1600HD only.
Ensuring high quality while protecting the environment: Roland is ISO9001 and ISO14001 certified

Roland Systems Group, a member of the worldwide group of Roland companies, is dedicated to the support of audio and video professionals demanding excellence in both performance and system design. Through the development and support of video and audio products, we endeavor to improve workflow and maximize creative possibilities.
