

## Two-Way Radio to PA Speaker System

### Key Features:

- **Activate Any Nearby Speakers Set to a Specific Frequency and Tone**
- **Easy Setup with Minimal Installation Requirements**
- **Provides Instant Mass Communication**
- **Page a Specific Speaker, a Group of Speakers, or All Speakers**
- **Supports Unlimited Speakers**
- **Low-Cost System**

**The Visiplex Two-Way Radio to PA Speaker System** is a cost-efficient solution to install a PA system at any facility.

When the two-way radio is used, the audio will be received by the nearby VNS2200 controllers and played from their attached speakers. The system supports an unlimited amount of speakers.

The VNS2200 controller connects directly to an electrical outlet from its Power port, then directly to the speakers from its Speaker port, allowing for a fast and easy installation process.
