

DMS-AV

NETWORK HOME THEATER AMPLIFIER / PROCESSOR

High performance home theater that will move you

Introducing the DMS-AV, URC's state-of-the-art Home Theater Amplifier. The DMS-AV delivers crystal clear audio and video to your home theater or entertainment room. Incorporating 7.2 surround sound, Dolby® TrueHD, DTS-HD Master Audio™, and URC's proprietary multichannel stereo and surround modes, this beauty delivers uncompromising audio to your theater experience with stellar detail and clarity. With the latest A/V processing, we give you true video scaling up to 1080p with musical performance to match. Add realism and incredible power to all your movies and music with the DMS-AV. It will literally move you and your guests – every time you turn it on.

Unite your theater with the finest in home control

By combining the DMS-AV with URC's Total Control® or Complete Control™ system, you gain a level of sophistication and ease-of-use that's unparalleled. From simple remotes to brilliant touchscreen controls, or even your iPad® – it takes just one touch to dim the lights and start the latest movie right on cue. And, the DMS-AV connects to your home network, so with Total Control, you can expand your theater into the whole house! Every audio product in the theater can now be shared.

Imagine taking an older CD player or turntable and streaming music from it into other rooms – and, being able to control song choice and volume from anywhere.

Hallmark technology meets unparalleled flexibility

For millions of homeowners around the world, URC is synonymous with ease-of-use and the best in control technology—and for good reason. For over twenty years, our innovative controls and designs have been used by the world's most recognized A/V brands including Denon, LG, Sony, Samsung, Sharp and countless others.

URC's DMS-AV is based upon this legacy and adds pristine sound and picture quality. Our expertise gives you the most flexible Home Theater Amp / Processor on the market that is capable of growing with your family as your needs change. When other URC DMS products are added, you can enjoy up to 44 audio inputs! So sit back, relax and let our DMS-AV transport you to the theater or concert, with the best in whole-house integration and control.

Tech Talk
