

Hear the truth™

JBL ONBEAT AWAKE™ WIRELESS SPEAKER WITH CLOCK AND APP

LEGENDARY SOUND SINCE 1946

WAKE UP TO SUPERIOR WIRELESS AUDIO

Gone are the days of waking up to the sounds of a harsh alarm clock. Meet the JBL OnBeat aWake™ Wireless iPad Bedroom Speaker – the perfect companion to your treasured tablet. Designed to rest on your bedside table while you're catching some zzzzs, it automatically recharges your iPad throughout the night. Come morning, you're awakened with the music from your own library. And if you want to undock to watch movies, play games or simply catch up on the news while listening to music, no problem. Just connect via *Bluetooth*® technology, brought to you by HARMAN TrueStream™. A free downloadable app – AmpUp™ – is also available, which allows you to fully customize your bedside experience.

Powered for a Perfect Awakening

- Wireless audio streaming
- HARMAN TrueStream technology

KEY FEATURES

JBL ONBEAT AWAKE™

Hear the truth™

As a perfect bedside companion, the JBL OnBeat aWake helps you wake up refreshed, recharged and ready to take on the day.

Wireless audio streaming

Listen to music, watch movies and play games, all from the comfort of your bed. The JBL OnBeat aWake is designed to bring out the best in your iPad, but it also works with your iPhone, iPod touch and virtually any other audio player equipped with *Bluetooth* technology.

HARMAN TrueStream technology

HARMAN TrueStream is our guarantee that you will experience the best possible listening experience when streaming wirelessly via *Bluetooth* technology. Because there are many connectivity options when it comes to *Bluetooth* technology, our engineers always use the most current and most advanced – this ensures the highest quality sound no matter the application or source device.

Slipstream port technology

Slipstream port technologies provide listeners with powerful, great-sounding bass with low distortion. Whether the JBL OnBeat aWake is docked or streaming, you'll hear real bass you can feel.

Powerful JBL drivers

Two JBL full-range transducers provide you with room-filling sound.

Free AmpUp downloadable app

Rather than waking up to shrill sounds, you can serenely open your eyes to the sounds of your favorite music. Download the free AmpUp companion app, which allows you to customize your wake-up theme, choose a lullaby that helps you fall asleep and access your daily calendar.

Smart touch snooze control

We know everyone needs some extra shut-eye upon awakening, so we made it easy. Smart touch snooze controls allow you to simply tap the bedside table for extra zzzzzs.

Dock charger for iOS devices

This work of beauty isn't just for your iPad. While the free app can be used with your iPhone and iPod touch, the JBL OnBeat aWake can dock and recharge both as well as the iPod nano and classic.

Easy-to-read screen display

There's no need to squint in the dark – all your information, including the weather, time, calendar and current music track, is displayed prominently on your iPad. Easy-to-access brightness controls are included, which lets you read the integrated clock when you need a little extra light.

Auxiliary input for additional source devices

Whether your device is *Bluetooth*-enabled or not, the JBL OnBeat aWake allows you to take full advantage of its incredible sound – thanks to the aux-in connection.
