

Simply Brilliant.

**total control**

Connect with your home and loved ones in a whole new way.

Have you ever wished for a magic little box that controls everything in your home?

Something that enables you to hear your favorite music anywhere in the house, watch your favorite programs, dim lights to match the mood, and shows you who is on your front doorstep—all from the comfort of your couch?

A magic, seamless solution that connects you with your home and loved ones in a whole new way.

Wish no longer, your dream has come true.

At URC, we bring whole house control to life, making it personal for real people and real homes—every day.

**That's Total Control.**

**The system that will change your life . . .**

# Brilliant.

Total Control is a family of innovative products that work together flawlessly to deliver newfound convenience, comfort and security. Designed for everyday living, you can easily control your entertainment, lighting, climate and more. Consolidate all your electronics into one easy-to-navigate menu—and enjoy simple control from anywhere around the house or around the globe. Total Control puts it all in your hands.

**Easily control your TV, music system, lighting, climate, security and more.**

## A home control system can . . .

- Make all your electronics work together as a system
- Provide one simple solution to control the things you want—from anywhere
- Unclutter your home, allowing one smart remote to access it all
- Create a more convenient and energy-efficient home
- Enhance security by making your home lived in—no matter where you are

# Anything is possible.

## **One touch, instant entertainment.**

Be the master of all your entertainment with powerful home theater control. Push a button and the flat screen turns on, the disc player fires up to your movie of choice, the surround sound comes to life and the lights go down to start the show—no need to think, just enjoy!

## **Superior sound, all around.**

Enjoy access to all of your favorite music, regardless of the format—CDs, internet music and more! Stream the same tune throughout the house—or a different song in every room. Browse your iPod by artist, cover art, song or genre from any touch screen, TV or keypad. And all the while, the music retains its full original fidelity and high quality.

## **Light up your life.**

Set the mood! Turn on, off and dim house lights—individually or all at once. Create room lighting scenes on demand, or that activate automatically, even when you're not around. Delight in the perfect ambiance while conserving electricity.

## **Safe and secure, at home or away.**

Gain instant peace of mind from anywhere—inside or outside your home. Our friendly, simple interface enables one touch “arm or disarm,” and shows any zone of your security system at a glance. Our surveillance cameras keep you posted on what's happening at the backdoor, pool or nursery.

## Make it cool, very cool.

Live in your comfort zone every day in a whole new way. Adjust the temperature on designer keypads from anywhere in the home. Control heating and cooling daily or seasonal schedules for greater comfort and to save money. Who says thermostats can't be cool?

## Green home, smart idea.

Monitor home energy consumption even when you're away. Easily set schedules for temperature and lights based on time of day or year, saving money and conserving energy. Go green—and save some green. Now that's smart.

## Total Control products are . . .

- Professionally and easily installed
- Personalized to fit your lifestyle
- Fun and easy to use
- Affordable for everyday living
- Expandable—easy to add more devices and features
- Ones that make you the envy of the neighborhood

- Wake up to music you love in the morning
- Check the weather, your stocks, and favorite team scores on the keypad
- Set timers for security, temperature and lights—exactly how you wish
- Keep an eye on the doors and kids in the yard
- Enjoy all your favorite internet radio stations, plus SiriusXM®, Pandora® and Rhapsody®
- Monitor your household energy consumption

## Go ahead, get personal.

Every family is unique. And, every home whether mansion, cottage, condo, or igloo, has its own particular characteristics. Total Control provides personalized convenience, comfort and security to all families and all homes—regardless of style or budget. This is not a “one size fits all.” Each Total Control system is custom installed to fit your lifestyle and wishes, and ready to grow as your family and your needs change.

# Amazing audio when and where you please.

Stream any kind of music in its original full fidelity—anywhere, anytime. Create party or workout playlists. Listen to your own collection, internet radio, popular services like SiriusXM® and Pandora® or your iPod in any room—up to 32 separate areas. Unlike most systems that “compress” audio and significantly compromise sound quality, Total Control is unique, delivering music in its original, full quality and synchronizing it everywhere. High performance sound can live all around.

# Always in touch from anywhere.

Stay connected with your home and loved ones from across the room or across the globe. Change temperature or assess the security situation in an instant. With Total Control in your hands, you can watch over your home and family's wellbeing—even when you're on vacation.

## One powerful control app puts it right in your hands.

Just a few years ago, who would have imagined that apps on mobile devices would so completely integrate into our lives? With Total Control, you can even turn your iPad or iPhone into a friendly controller right now. Monitor, manage and control just about anything—at home or away.

# Room to grow.

Start out with something simple such as music everywhere. Total Control is adaptable, and it can begin in one room and grow throughout the house—even to the outside.

As you upgrade that unfinished room, easily expand to add and control an entertainment system. Or, as you go through changes in life, add control of climate, lighting, drapes, projectors, security systems, surveillance cameras, iPods—the list is practically endless! If you can imagine it, we can control it.

**Start with a simple or medium system, such as music in every room with one-touch access to favorites and playlists.**

**As your family and needs grow, easily add lighting, security and climate controls down the road.**

## Remote access means simple upgrades.

Total Control makes it easier than ever for you and your Authorized Professional to upgrade your system right when you want it—even from their office. Because the system sits on a network, just like your home computer, we make it easier for you to add new capabilities and make changes. No more calling for an appointment, waiting for the service truck, or waiting at home until the installation company arrives.

## Built on an IP backbone makes it future forward.

URC's Total Control leverages the wiring in your home, which means it's more efficient to install and no reconstruction is required. And because it's wired and not wireless, it's inherently more reliable. We employ the latest technologies so that you can add on with ease and protect your investment. Rest assured, Total Control is built to last and designed to grow with you as your needs change and as technology continues rolling forward.

Real people,  
real convenience.

**"I never knew what I was missing!  
Total Control provides so much convenience  
—everyone in the family benefits  
and the kids love it!"**

# total control

- Remotes and control interfaces
- Centralized and in-room controllers
- Audio streaming products
- Whole-house lighting controls
- Security and climate products
- Your own personal interfaces
- Energy monitoring solutions

## Bringing it all together.

**The brains behind the magic.** Whether displayed proudly in a rack or hidden inside a cabinet, Total Control's processors do the heavy lifting behind the scenes while you focus on the magic.

**Tuned to perfection.** Enjoy high-quality music streamed around the house from any source, including internet radio, SiriusXM®, Pandora®, and more. Add our award-winning DMS-AV for the finest in Home Theater performance with the ability to expand to whole-house music with ease.

**For your security, comfort and care.** Our surveillance products allow you to keep watch from anywhere in the world—and from the comfort of your couch.

**A family of brilliant, intuitive controls.** URC is known as the worldwide leader and premium manufacturer of ergonomic human interfaces—which are beautiful to look at and easy to use. With options for remotes, keypads, and touchscreens, it's your choice.

**Familiar controls of your own.** Total Control apps allow you to control your system via familiar, friendly devices such as iPads, iPhones and more.

# What makes **URC** different?

## 20-year innovation in control.

For more than 20 years, URC has been setting the standard for simple, universal handheld controls with over 100 million consumers worldwide. We provide control devices for many of the most respected global consumer electronics brands, so our experience is unmatched and always working for you.

Total Control uses our deep history and expertise, taking superior control from a one-room home theater—into the whole house. Simply put, there's no other home control system that can match Total Control's heritage or excellence in control.

## Making it real.

We are passionate and driven by our customers' lives and convenience they desire for everyday living. We understand your need to have one-touch access to the things that are important to you.

Total Control is an excellent technology that empowers you to control all of your devices at home for an affordable price. We make control a reality for real people—every single day.

Do you own a cable box, satellite, or major brand TV or flat screen in your home? Then chances are very high that you're living with URC right now.

# Ready to Get Started?

## It's really very easy!

Great home control starts with understanding your lifestyle and designing a personalized solution that fits your exact needs. URC partners with the best and brightest professional installation companies around the globe who share our commitment to simple, affordable control and excellence in design and service.
