

The Curved Multi Format Imager screen and masking system can display optional format choices while maintaining a constant height and allows for sizes up to 16' wide. The frame is offered in three different radius curves which are optimized for viewing based on size. The system includes your choice of Da-Lite's flexible screen surfaces, including our JKP Affinity line of front projection surfaces formulated to produce true color and white field uniformity.

In the open position, the Curved Multi Format Imager displays a Cinemascope (2.40:1) aspect ratio. With masking, you can achieve Cinemascope (2.35:1), Letterbox (1.85:1) and HDTV (1.78:1) formats. Da-Lite's Multi Format Imager is standard with Pro-Trim® finish, a fabric frame covering that aesthetically enhances the appearance of the installation while absorbing light that surrounds the viewing area.
