

Lockout Tagout Cabinets

Thomas Products Fiberglass Lock Out/Tag Out cabinets are not only designed to provide a centralized location for group safety lock out/tag out procedures, but can also be configured to store, organize and inventory locks, chains and tagging items. Thomas Products fiberglass cabinets are manufactured with high quality materials designed to protect sensitive equipment from exposure to harsh UV rays, chemicals, moisture, dust, salt air, insects, and temperature extremes. Thomas Products fiberglass cabinets are manufactured under U.S. Patent No. 4,998,587 and are available in a variety of UV inhabiting colors as well as interiors designed to meet your specifications. The rugged and durable construction of Thomas Products fiberglass cabinets combine to produce a dependable and virtually air tight enclosure that will last much longer than wood, steel, aluminum, or plastic cabinets. Thomas Products fiberglass cabinets can be wall mounted, attached to handrails, bulkheads, or designed to be free standing.
