

Material Safety Data Sheets - MSDS

Thomas Products Fiberglass Material Safety Data Sheet Cabinets are custom designed to protect the necessary and required Material Safety Data Sheets. These sheets stating all risk safety information under OSHA requirements must be available to employees on site. Manufactured with high quality, corrosion resistant materials designed to protect all inner materials from exposure to harsh UV rays, chemicals, moisture, dust, salt air, insects, and temperature extremes. Modular type construction that enables flexibility and variation in sizing, design, and interior configurations. These lightweight, yet heavy-duty fiberglass MSDS cabinets are the perfect solution in protection and storage of these valuable and necessary papers. These MSDS cabinets offer numerous options to meet your requirements, and they will last much longer than wood, steel, aluminum, or plastic MSDS cabinets.

Model: MSDS-1	Model Outside Dimensions (in inches)					
	Height	Length	Width	Depth	Weight	
	MSDS-1	19	N/A	12-1/2	4-3/4	8 lbs
	Model Inside Dimensions (in inches)					
	Height	Length	Width	Depth		
	MSDS-1	17-1/2	N/A	11-1/2 4		

NOTES : Available in every conceivable size, our material safety data sheet cabinets are designed to protect all MSDS used on site while allowing easy access to OSHA required data. These custom configured and designed fiberglass cabinets utilize marine grade 3/16" aluminum to withstand the most corrosive and hostile environments--a perfect MSDS container where chemical and saltwater environments can wreak havoc on your material safety data sheets or any other important documents. For document storage under tough exposure conditions, our durable fiberglass document storage gives you the protection you need. As with all of Thomas Products storage containers, the MSDS sheet storage lockers are available in standard or custom specifications for your material safety data sheet protection.
