

NORTH AMERICAN FIRE HOSE CORPORATION

The difference is... *your* margin of safety.

Lightweight Booster Hose 600™

Lightweight Booster Hose 600™ Features

- Lightweight, 100% polyester woven jacket construction designed for ease of handling
- Fabric construction features a very fine weave for improved abrasion resistance and to resist snagging in wild- land fire fighting situations
- Red or high visibility Yellow Ultra-Shield™ polyurethane coating seals each and every fiber in the bundle, further improving the abrasion resistance, reducing moisture and chemical absorption, and providing vivid color-coded identification
- The Dura-Thane™ polyurethane inner lining is extremely strong and durable, while maintaining a lightweight and compact profile
- Immune to the effects of mildew and rot, requiring less maintenance after use
- The perfect “Lite” weight choice for wildland booster reels
- Couplings available in either re-attachable or aluminum expansion ring styles with NST or SIPT threads
- Both the hose and couplings are Made in the USA and are fully NFPA 1961 compliant

Applications: Booster, Wildland, and Reels

Expansion ring coupling

Made in the USA
