

## Fig. 178

### Spring Cushion Hanger

**Material:** Spring cushion hanger Fig. 178 consists of a set of two springs and four cast iron retainers only.

**Finish:** Plain (retainers), Painted (springs)

**Service:** Generally used with Fig. 171 single pipe roll as shown in above photo. Recommended for installations where formal load and movement calculations are not required, or calculated movement does not exceed 1/4".

**Maximum Temperature:** 450° F at roller

**Approvals:** Complies with Federal Specification A-A-1192A (Type 49), WW-H-171-E (Type 50), ANSI/MSS SP-69 and MSS SP-58 (Type 49).

**Ordering:** Specify figure number, name and rod size. If used with Fig. 171 single pipe roll, pipe roll must be ordered separately. The retainers are casted to the dimensions as shown, but center hole can be drilled or reamed larger to satisfy the hanger rod required, up to the max rod size.

\* At maximum recommended deflection, spring can be compressed an additional 1/4" before becoming solid.

■ Maximum capacity of double spring hanger.

\*\* Can be drilled to max. rod size.
