

Micro Projector Lift

Designed for today's smaller projectors.

The Micro Projector Lift (MPL) is small and convenient, just like the projectors it is designed to accommodate. Weighing only 35 pounds, it can be installed in an existing 2' x 2' ceiling opening without disturbing the ceiling framework. The projector's "show" position can be set at any point with infinite adjustability, up to 48" extension.

The Micro Projector Lift utilizes the same exclusive 3-scissor design as Draper's popular Scissor Lift (see page 27), but features a compact side-folding scissor. The load is lifted by two 1" wide Kevlar® straps. Safety belt provides extra protection. Closed height of lifting unit is only 5" tall (not including projector, mounting mechanism or closure), so a minimal amount of overhead ceiling space is required.

System Options

- **Environmental Airspace Housing**—Aluminum housing isolates projector and lift from environmental airspace above the ceiling.
- **Ceiling closure panel**—White closure panel is optional and can also be adapted to attach ceiling tile to match surrounding ceiling. Ceiling closure panel option shown in photos at right.
- **Ceiling finish kit**—Ceiling closure panel and ceiling trim ring to finish ceiling opening.
- **Factory installed cables**—For Video and Projector Control. Draper will install cables on the lift to save installation time in the field.
- **Ceiling access door**—A 2' x 2' hinged door provides access to the MPL above a finished ceiling. Available with a white painted finish or recessed to accept ceiling tile.
- **Controls**—Includes 1 wall switch. Visit our website for other control options.

Dimensions & Data—Micro Projector Lift

Height of lift in closed position ¹	5"
Overall lift dimensions (W x L)	21" x 20¾"
Max. down travel	4'
Capacity ⁴	35 lbs.
Net weight of lift	35 lbs.

¹ Not including projector, mount/bracket or optional closure.

² Does not include allowance for closure panel. Closure panel weighs 10 lbs.
