

## LINK LICENSE

### LinkLicense

#### Use Third Party Devices as Primary Control Interfaces

Extron LinkLicense™ is a quick, cost-effective way for people to use their mobile devices or computers as primary control interfaces in an Extron control system. When combined with an Extron IPCP Pro control processor and Extron's TouchLink for iPad App, BYOD room control is easier than ever. Simply open the App or Web browser and gain instant access to the room's AV. The intuitive, custom-built GUI interface allows full control of source devices, sound, lighting - anything you can control with a standard touchpanel, but with the convenience of using your own device. Behind the scenes, you'll have the added power and security inherent in all Extron Pro Series control products. LinkLicense is applied per-system, not per-user, and there are no hidden costs. All new IPCP Pro control processors may be purchased with or without LinkLicense.

#### FEATURES

- Cut costs by using a single license per system, not per user
- Operates seamlessly with the TouchLink App
- Use in a system where a TouchLink Pro touchpanel may not be present
- Make system operation more convenient for the user
- Save money by using low cost Extron Apps for control
- Simplify deployment of BYOD – Bring Your Own Device control designs
- Ease support by standardizing on a consistent BYOD control approach across your organization
- Streamline the purchasing process and reduce administrative burdens
- Enable user interfaces that are customized for your user's devices or the application needs

### Three Easy Steps to use mobile devices or computers as primary control interfaces in an Extron Control System:

**Step 1**

Purchase an Extron IPCP Pro Series Control Processor with a LinkLicense included or add a LinkLicense to an existing IPCP Pro control processor.

**Step 2**

Create a custom user interface and configure your control system using Global Configurator Plus or Professional.

**Step 3**

Upload your user interface designs and use your mobile device or computer to control the system.

## USER INTERFACE DESIGN SOFTWARE

### GUI Designer

#### Free Design Software for User Interfaces

Extron GUI Designer is a software application used for the design, creation, and maintenance of Extron TouchLink® Pro user interfaces. Begin with ready-to-use design templates and resource kits, or start from scratch and build your own layout using our comprehensive software. The available design elements are fully customizable and matched carefully to popular AV system applications. In many cases, all the input sources, display control, and environmental settings are already in place. These resources are fully developed and include complete, detailed documentation.

#### FEATURES

- Available for free from [www.extron.com](http://www.extron.com)
- No graphic design skills required
- Includes ready-to-use templates for popular AV system applications
- Complete resource library of customizable elements
- Dynamic Scaling for easy conversion of GUI designs between different touchpanels
- Easily modify templates, or start from scratch for a fully customized layout
