

# Signature Series Features

We thought of it... so you didn't have to.

The focus of Gator Frameworks is to ensure that every point that you operate your stand feels comfortable in your hand and functions smoothly. Every latch, clutch, knob and lever has been researched and designed around your hand to protect it and to make it smooth to operate. Functionally every stand is designed to operate as simply and natural as possible. Fine details like matte finished surfaces are a deliberate step to make the stand less intrusive on its environment whether at home or on the stage.

*When you feel a Gator Frameworks stand you will know the difference... our designs are truly musician and human centered.*
